

All the information you need from just a phone number! There's nothing faster or easier. Express*fill* takes a prospect or applicant's area code and phone number, and gives you all the information you need to complete an application, saving you time and reducing errors. Express*fill* provides the following:

Phone Search

- Full name of applicant
- Full address of applicant

UDV

- Name of each household resident
- Birth date of each resident, where applicable
- Driver License number of each household resident (in some states)
- Make, model and VIN of each vehicle associated with the applicant's name and address (where available)

The Express*fill* process utilizes Phone Search and UDV results to pre-fill MVRs or other underwriting report requests, such as Claims History reports, on each driver (actual ordering of reports is optional).

It makes no difference whether you are gathering or simply verifying application data. The simple input of area code and phone number provides the information you require to complete or verify the interview with a potential customer. Express*fill* quickly provides more accurate information on your prospect – saving you both time and improving accuracy.

Exclusively available on ExpressNet

Where do you go for information?

If it's not iiX, a unit of ISO, you'll want to make a change. For more information on Express*fill* or other iiX underwriting services, simply call us toll-free at (800) 683-8553 or visit our Web site at www.iiX.com. iiX, 3011 Earl Rudder South, College Station, TX, 77842.
